Summary

Software Development Specialist with over five years of experience in backend, full-stack, and low-code application development. Experienced in building and maintaining enterprise applications using PHP and Laravel, developing applications with OutSystems, and delivering full-stack solutions across backend APIs, databases, frontend interfaces, and mobile applications.

Strong background in requirements analysis, solution design, RESTful API development, third-party integrations, production support, testing, and Agile delivery. Experienced in developing solutions for both B2C and B2B business models and applying object-oriented programming, SOLID principles, and clean code practices to create maintainable applications.

Comfortable working across different technologies and development environments, with practical experience interacting with CI/CD pipelines and Kubernetes-based deployments for application monitoring, troubleshooting, and log analysis. Adaptable, product-focused, and open to learning new programming languages, frameworks, and technologies based on business and project needs.

Professional Experience

Tamkeen Technologies | Software Development Specialist (Senior Level) | October 2023 – Present

- Developed and maintained Laravel backend services across microservices-based systems, transitioning in 2026 to working on the monolithic architecture of Musaned V2.
- Designed and implemented RESTful APIs, business workflows, background jobs, and integrations with government and private-sector systems.
- Participated in solution design and technical planning to translate business requirements into maintainable backend solutions.
- Improved code quality and maintainability through legacy code refactoring, DTO implementation, unit testing using PHPUnit, and code reviews.
- Investigated and resolved production incidents, integration failures, performance issues, and application defects across multiple Musaned services.

Tamkeen Technologies | Software Engineer | June 2022 – October 2023

- Built RESTful APIs, business workflows, background jobs, and integrations with government and private-sector systems.
- Improved database performance and data consistency through SQL query optimization, schema enhancements, and validation rules.

- Enhanced code quality and maintainability through structured refactoring, DTO implementation, unit testing using PHPUnit, and code reviews.
- Investigated and resolved application defects, integration failures, and production incidents in collaboration with cross-functional teams.

Tamkeen Technologies | Analyst – Solution Design | September 2021 – June 2022

- Designed and developed internal business applications using the OutSystems platform Documented user journeys and functional specifications to guide development, testing, and deployment activities.
- Prepared and executed test cases following formal quality assurance methodologies.

Extreme | Full Stack Web Developer | May 2019 – January 2020

- Developed responsive web applications aligned with client requirements using HTML, CSS, JavaScript, PHP, and Laravel.

Projects

Musaned Platform V2 | Backend Development — Monolithic Architecture

Musaned Platform V1 | Backend Development — Microservices Architecture

- Contributed to multiple Musaned products and services, including Employment Contract Authentication, Domestic Labor Transfer for individuals and establishments, the Wage Protection System, Absent Laborer Transfer to a New Employer, Marketplace services, and VIP Laborer services.
- Developed and maintained backend APIs, business workflows, service integrations, scheduled processes, and asynchronous jobs across these services.

Laravel Pentest Scanner | Open-Source Security Package

- Developed an open-source static analysis and security scanning tool for Laravel applications using PHP.
- Designed the package to identify common OWASP and application-security vulnerabilities, including injection flaws, broken access control, exposed secrets, security misconfigurations, and API security issues.
- GitHub: github.com/ralsofyani/laravel-pentest-scanner

McJob | OutSystems Development

- Built user interfaces, business logic, data models, and integrations using OutSystems development practices.

Education

Bachelor of Computer Science | Princess Nourah bint Abdulrahman University | 2020

Certifications

- Microsoft Azure AI Fundamentals (AI-900) | Microsoft | 2026
- ITIL 4 Foundation | PeopleCert | 2026
- GitLab Certified CI/CD Associate | GitLab | 2025
- Professional Scrum Developer I (PSD I) | Scrum.org | 2024
- Associate Traditional Web Developer | OutSystems | 2022
- Associate Reactive Developer | OutSystems | 2021
- Full Stack Developer Nanodegree | Udacity | 2018

Skills

- **Programming & Development:** PHP, Laravel, JavaScript, SQL, REST APIs
- **Software Engineering:** Software Development, Application Design, Debugging, Testing, Code Review, Technical Documentation, Quality Assurance
- **Development Tools:** Git, GitLab CI/CD, PHPUniti98ewf
